

Generic Joomla Site for Classes

Contributed by Mike Lyman
Saturday, 15 September 2007

Welcome. This is a generic class Joomla site that we have put together to help speed up the time it takes for a class to get a Joomla based website functioning. Rather than let each class figure out how to create menus and news categories for stories, we set up the basics a class may want. We also installed some basic add-ons like a picture gallery and web discussion/bulletin board systems.
